Profile

Data Science master's student in Germany with hands-on experience building machine learning, analytics, and dashboard systems across finance, NLP, and computer vision domains. Strong in Python, SQL, ML pipelines, and end-to-end data workflows.

Experience

Data Analyst - CloudStudio IT Services Pvt Ltd Aug 2024 - Jan 2025

- Analyzed and validated 20k structured business records to generate decision-support insights using Python, SQL, and Excel
- Designed and delivered 5 interactive Power BI dashboards tracking operational and performance KPIs
- Automated weekly data preparation and reporting workflows using Python
- Created analytical reports and stakeholder presentations using Microsoft Office tools

Projects

Financial Market Analytics Dashboard [GitHub](#)

- Built an end-to-end multi-stock analytics pipeline using Python, MySQL, and Apache Superset across 3 pipeline stages (data ingestion, analytics, visualization)
- Processed 10+ stock symbols with historical datasets containing thousands of time-series records
- Implemented 6 technical indicators (moving averages, volatility, beta, returns, rolling statistics, trend signals)
- Designed 15+ optimized SQL analytical queries for cross-symbol performance evaluation
- Developed interactive dashboards featuring 5+ visualization types and drill-down filtering
- Reduced manual analysis effort by automating data refresh and visualization workflows

Real-Time Speech-to-Sign Translation System [GitHub](#)

- Developed a 3-stage real-time speech-to-sign pipeline (ASR → NLP tokenization → gesture mapping)
- Integrated Whisper ASR with NLP processing including POS tagging and token extraction
- Converted speech into structured linguistic tokens mapped to gesture outputs
- Built a multilingual Streamlit interface supporting 3+ interaction workflows
- Evaluated system performance under 2 testing environments: clean audio and noisy audio conditions
- Processed multiple real-time audio samples to validate pipeline latency and responsiveness

Multi-Class Object Detection - CNN Model [GitHub](#)

- Built a CNN-based model for multi-class object detection using a 2-stage learning setup (localization + classification)
- Trained and evaluated the model on labeled image datasets containing multiple object categories
- Implemented bounding-box regression and classification heads within the neural architecture
- Applied 4+ preprocessing and augmentation techniques (scaling, flipping, normalization, rotation)
- Improved detection robustness through iterative training and validation cycles

Skills

Programming & Data Analysis - Python, SQL, Pandas, NumPy, SciPy, Exploratory Data Analysis (EDA)

Machine Learning & Modeling - Scikit-learn, Regression, Classification, Feature Engineering, Model Evaluation, Cross-Validation, CNN, Object Detection

Analytics & Visualization - Power BI, Apache Superset, Dashboard Design, KPI Tracking, Analytical Reporting

Data Engineering & Databases - MySQL, Data Cleaning, ETL Concepts, Structured Data Processing

Tools & Workflow - Git, GitHub, Jupyter Notebook, Streamlit, Experiment Tracking

Education

Friedrich-Alexander-Universität Erlangen–Nürnberg (FAU) Erlangen, Germany
M.Sc. Data Science Oct 2025 – Present

SRM Institute of Science and Technology Chennai, India
B.Tech Computer Science and Engineering CGPA: 8.22/10

Achievements & Certifications

- Conference Papers - ICIOT 2025 (Financial Market Analytics), AIDE 2025 (Speech-to-Sign Translation System)
- NPTEL - Introduction to Algorithms and Analysis (IIT Kharagpur, MOE India)
- Certifications - IBM AI Engineering • Python for Everybody • Microsoft Power BI Data Analyst
- Training - AWS Academy Machine Learning Foundations • Data Science Program (Skill Vertex)

Languages

English (C1 - Fluent) • German (A1 - Basic, actively improving) • Kannada (Native) • Telugu • Hindi
